FOR IMMEDIATE RELEASE

Naqi Logix Executes on Critical Milestone: Signs with Contract Manufacturer, Leading Path to Commercialization

Agreement advances Naqi's hands-free, voice-free earbud-based neural interface from advanced prototypes toward production readiness

Vancouver, BC — [September 1, 2026] — Naqi Logix Inc. ("Naqi" or the "Company"), an AI-neurotechnology company that is a silent, invisible interface between humans and technology, executes on a major milestone by signing with a contract manufacturer that will support the advancement of its Naqi Earbuds from advanced prototype development stage to production readiness.

The contract manufacturer agreement covers product assembly, printed circuit board ("PCB") fabrication, final integration, testing, and quality assurance for Naqi Earbuds, a wearable interface designed to enable digital control through subtle facial micro-gestures and head movements.

"We've already solved the hard problem, translating facial micro-gestures into reliable digital commands. The next challenge is putting this in the hands of the people, and that's exactly why we chose a manufacturing partner who can scale with us with our Naqi Earbud," said Aly Sidi, Chief Technology Officer of Naqi Logix. "Going from advanced prototypes of the Naqi Earbuds to product readiness is the milestone this partnership represents."

Operations have already commenced with the contract manufacturer under the terms of the agreement and scope of work. The contract manufacturer is anticipating tooling and pilot runs by the second quarter of 2027 and targeting production readiness for scaled manufacturing by end of 2027. The execution of this agreement represents a critical step towards commercialization.

“Signing this manufacturing agreement marks an important inflection point for Naqi Logix as we move from advanced prototype development toward production readiness,” said Mark Godsy, Chief Executive Officer of Naqi Logix. “Our technology is designed to fundamentally change how people interact with digital devices by providing a silent, hands-free and voice-free interface that translates subtle human signals into real-time commands. With manufacturing operations now underway, we are focused on working closely with our partners to build a scalable production platform and position Naqi for the next stage of commercialization. This milestone represents meaningful progress for our company, our technology and the opportunities ahead.”

About Naqi Logix

Naqi Logix Inc. is an AI-neurotechnology company that is a silent, invisible interface between humans and technology. Naqi’s non-invasive, earbud-based neural interface platform captures biosignals and uses proprietary AI to interpret intent, turning subtle facial micro-gestures and head movements into real-time digital commands. Safe, private, and camera-free, Naqi enables hands-free, voice-free, screen-free, implant-free control across computers, mobile devices, robotics, and connected environments.

Forward Looking Statements

This press release, including any materials referenced herein, may contain forward-looking information or statements under applicable Canadian and U.S. securities laws (collectively, “forward-looking statements”), including, without limitation, statements regarding the future plans, objectives and goals of Naqi Logix Inc. (the “Company”); the Company’s future financial results; the anticipated advancement of and benefits derived from the Company’s neurotechnology program; the results of ongoing equity and debt financing activities, agreement with Contract Manufacturer and the Company’s Regulation A+ Offering. Forward-looking statements may be identified by terminology such as “believes,” “expects,” “anticipates,” “estimates,” “intends,” “plans,” “projects,” “potential,” “may,” “might,” “will,” “could,” “should,” or “would,” or negative versions thereof or similar expressions.

Forward-looking statements reflect current beliefs of management of the Company and are based on certain factors and assumptions, which by their nature are subject to inherent risks, uncertainties and assumptions about the Company, including, among others, related to the Company’s business developments and growth strategy; the Company’s future performance, business prospects and opportunities; the Company’s limited operating history and history of losses; the availability of adequate financing and on favorable terms; the Company’s foreign private issuer status; customer demand for the Company’s products and services; technological changes; the competitive landscape; the Company’s ability to manufacture or distribute products and services; the protection of the Company’s intellectual property and user data; legal, tax and regulatory complexity and uncertainty including with respect to required regulatory approvals for the Company’s technologies for medical applications; internal controls; the Company’s ability to attract and retain skilled personnel; uncertain political and economic conditions; inflation and interest rate variability; supply chain and engineering challenges; cybersecurity threats; the Company’s success at managing risks; and other risks discussed in the Company’s periodic and current reports and offering statements filed with the U.S. Securities and Exchange Commission, which are available for review at www.sec.gov. Forward-looking statements are not guarantees of future performance and actual events and results could differ materially from those expressed or implied by forward-looking statements.

Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date of the press release or as of the date otherwise specifically indicated herein. Other than as specifically required by applicable law, the Company does not intend to update any forward-looking statements whether as a result of new information, future events or otherwise.
